

# Wine Bottle Umbrella

## How To Use:

To open, twist the upper handle of the wine bottle in a clockwise motion, and pull the umbrella straight out.

Unwrap the cord, and extend the umbrella out fully.

Fold the outer-most joints inward to lock into place.

Pop the top off to reveal a nylon loop for convenient hanging and storage.

Note: the bottom of the bottle may have come loose in shipping. It easily pops right back on. You can remove this bottom to ventilate or air out the casing, which may be needed after storing a wet umbrella.

To prevent mold/mildew buildup, do not store wet umbrella for extended periods of time inside its case.
